KOZELSK ICBM COMPLEX, USSR

The Kozelsk ICBM Complex, located about 5.5 nautical miles (nm) generally south of the town of Kozelsk, occupies an area 16 by 10 nm in gently rolling, forested terrain.

The complex (Figure 1) includes a complex support facility, a rail-to-road transfer point, 7 Type IIID launch sites, 3 Type IIC, and 2 Type IIIB launch sites. The rail facilities serving the complex consist of 2 short spurs, one to the complex support facility and one to the rail-to-road transfer point, from a branch of the Smolensk/Tula rail line.

The complex cannot be negated. The earliest photographic coverage of the area occurred on [] but the small scale and poor quality of the photography precluded confirmation or negation of the complex. The first positive identification of complex components was made on Mission [] when Launch Sites 2 and 3 (Type IIC) were identified. On re-examination of [] the complex support facility and Launch Site 3 were revealed. The first Type IIID site was observed on [] it can be negated on []
